

Apollo 16: Descartes highlands

Apollo 16 explored the Descartes highlands on the Moon. John W. Young and Charles M. Duke Jr. explored the lunar surface, while Thomas K. Mattingly II worked from lunar orbit in the command module.

The mission launched on April 16, 1972 and splashed down on April 27, 1972. Its objectives included surveying and sampling the landing site, deploying surface experiments, and conducting observations from lunar orbit.

Crew and roles

Role	Crew member	Where they worked
Commander	John W. Young	Lunar surface
Lunar Module Pilot	Charles M. Duke Jr.	Lunar surface
Command Module Pilot	Thomas K. Mattingly II	Lunar orbit
